Eco-Venetian Stone™ Combo

The advent of the Pavestone Eco-Venetian Stone™ makes this the latest product development in permeable pavements. Its modular square and rectangular shapes and uniquely attractive cleft surface set it apart from other permeable pavement treatments. This texture resembles stone facing and invokes a more natural convention. The Eco-Venetian Stone™ larger scales lends itself to stately residential settings and more expansive commercial applications. Its modular pattern equalizes the scale of any project and is fitting to most any architectural elements.
